Subject: RE: Communication: Bob Kaplan and President Wildcat re: S2C2 Model release to WDNR with Tribal disclaimer/FURTHER Clarification

Hi Anthony, Further clarification, I just spoke with Tribal President in person a few minutes ago; President Wildcat is clarifying that he did speak to Bob but only relayed that he did not concur or agree with EPA to send out the model or disclaimer; however; relayed that the discussion they had was that President Wildcat would like to discuss the issue further with staff and set up a meeting with EPA before it was released.

So I apologize for any confusion. The entire project and communication occurring at different levels is frustrating and hard to get a handle on.

Thanks for assistance.

Subject: RE: Communication: Bob Kaplan and President Wildcat re: S2C2 Model release to WDNR with Tribal disclaimer

Hi Anthony, I just want to clarify that I spoke with Tribal President Wildcat yesterday evening 05/24/2017, he states he has not spoken with Bob Kaplan, Interim EPA Region V Administrator regarding this. President Wildcat stated he tried to call Bob last Thursday and only left a message.

I will be talking to President Wildcat in preparation of a response to the overall release of information for this incomplete inaccurate S2C2 visualization model for Haskell Lake/Tower Standard LUST site and the disclaimer that was not agreed to by our Tribe. I appreciate the involvement of your office as I am very concerned that Indian Policy is not being followed as well as the lack of trust responsibility involved with a true government to government relationship.

We will keep you posted.

Thank You.

Subject: planning for calls

Dee and Kristen: Thanks for your call this morning. Some responses to the points we talked about:

- I talked to Bob Kaplan directly and he told me he and President Wildcat spoke later in the day Friday, after the exchange of messages. The key part of their conversation was that access to the data model would be provided to WDNR very soon. As a general policy, EPA places a high value on data transparency. And that in this particular case, we are simply out of time. I understand WDNR has

since been granted access.

- WDNR would like to re-instate the regular three-party tech calls, starting tomorrow. LCD has asked for an agenda. We should all hear directly from WDNR with the invitation. WDNR agreed earlier to TIAO participation and facilitation.
- Best scheduling opportunity for a LDF-EPA meeting to pursue the agenda you provided earlier is next week. Do you have preferred dates and times Tues/Wed/Th?

Let me know your preferences and I'll help get things set up. Thanks again.
